

COMPUTER TECHNOLOGY SERVICES FOR BUSINESS

Looking for a solutions provider that stands out of the crowd?

At Netdigix we are committed to providing innovative and sensible technology solutions for your business.

We understand your needs and the information technology strategies and solutions that will help you and your business succeed.

Computer systems

- ❖ Desktop support
- ❖ Server maintenance
- ❖ Linux and Windows
- ❖ Upgrades and implementations
- ❖ Server audits and design
- ❖ Backup and recovery systems

At Netdigix, we've learned that there is no substitute for a well designed and well supported technology environment. Whether you are upgrading hardware or setting up a new computer system, Netdigix understands your needs and we have taken our experiences and expertise to develop a suite of services that will help you get the most out of your information technology.

Networking and Security

- ❖ Routers and switches
- ❖ Firewalls and security
- ❖ Load balancing and redundancy
- ❖ Wireless access points
- ❖ Virus, spyware and spam solutions
- ❖ VPN and remote access

Your network should provide you with more than just connectivity. Successful networking means more than just installing a piece of hardware. Modern networks have to support mission-critical applications, more users and higher bandwidth requirements as well as security threats from both inside and outside the network.

Professional Services

- ❖ Managed Services
- ❖ Contract IT Staff
- ❖ 24x7 on-call support contracts
- ❖ IT Strategy planning
- ❖ Managed hosting services
- ❖ Application coding & Databases

Having skilled and experienced IT professionals available to maintain and support your network is a key component for any business. At Netdigix we create custom sensible solutions to suit your business environment.
