

Netdigix Network Cabling

By Netdigix Systems Inc. ■ <http://www.netdigix.com> ■ 604.518.6695

Dependable communications cabling

In today's ever dependant technology workplace data speed and reliability are the key to success and productivity. Communications networks have to cope with the rapidly increasing volumes of voice, data and multimedia traffic, to insure that these networks are available 24 hours a day and 365 days a year is critical to your business performance. Netdigix specializes in enterprise class and data center quality data and voice cabling in a structured environment. Since 1999 We have selected the best in class communications and networking products in order to offer our clients the best in value, performance and reliability.

We understand that the backbone of all IT infrastructure rely on stable, high speed communications. Unlike our competition which may also do "communications wiring" along with electrical (their main focus), Netdigix is focused and dedicated on specializing in only data and communications wiring. Our installations are installed and tested against industry standards such as Category 5e and Category 6.

Cabling Classes and types

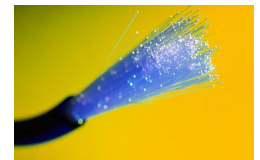

- Copper Ethernet
 - Category 6
 - Category 5e
 - Category 3
- Fiber Optics

- New cable installations
- Re cabling
- Cable cleanup and redesign
- Cable repairs
