

Netdigix Network Consulting

By Netdigix Systems Inc. ■ <http://www.netdigix.com> ■ 877.518.6695

Networking services and solutions

Your network should provide you with more than just connectivity. Successful networking means more than just installing and configuring hardware. Modern networks have to support mission-critical applications, more users and geographical locations, higher bandwidth requirements and security threats from both inside and outside the network.

The scale and expertise to support your network

At Netdigix, we have the scale and expertise to create a complete solution for your organization. From planning, designing, building and upgrading your network infrastructure. Netdigix offers flexible networking solutions custom fit for each unique business environment in order to provide the capabilities that are necessary to manage today's complex and diverse dynamic network infrastructures. It enables businesses to:

- Increase service levels to business users and clients through optimized network performance and availability.
- Manage your security to ensure your network is not vulnerable to hacker attacks.
- Implement network based technologies that can improve the efficiency of your business.
- Apply proven methodologies, tools and applications for cost-effective network integrations and deployments.

Networking Vendors

Netdigix supports a wide range of vendor platforms and products ranging from switches, routers, firewalls, load balancing and wireless devices. We help you choose the best combination of networking products to fit your specific needs and requirements:
