

# Netdigix Consulting

For Microsoft software products

By Netdigix Systems Inc. ■ <http://www.netdigix.com> ■ 877.518.6695

## High performance computing solutions.

### Leading the desktop and server marketplace.

Microsoft has long been the leader in the operating system and application market place. With a majority of all desktops and LAN servers in the corporate workplace being predominantly Microsoft it is easy to say it is the standard for business applications.

### Powerful Effective Technology.

Powerful technologies from Microsoft enable organizations to optimize their business effectiveness, from high-performance clustered servers to Web based applications and desktop environments. At Netdigix we assist corporations in the planning, development, deployment and support processes in order for them to leverage and integrate a wide range of Microsoft technologies into their computing environments.

### The Netdigix difference.

Netdigix not only supports major Microsoft server and desktop technologies but we also upgrade, migrate and deploy these technologies in mixed or multi platform environments.
